Streamline Your Business Processes Reduce Your Paperwork Gather More Accurate & Meaningful Information

(All While Improving Safety, Efficiency & Meeting Compliance)

Actionond is a software workplace platform that allows your business to share information so you can work smarter and engage with your people and your clients to optimise your objectives.

Actionond achieves this with different easy-to-use modules that integrate with each other. There are currently 6 major modules that will simplify your business needs.

Dashboard

The **Actionond** Dashboard provides a simple and quick snapshot of your business with visibility and insights to help improve safety and compliance.

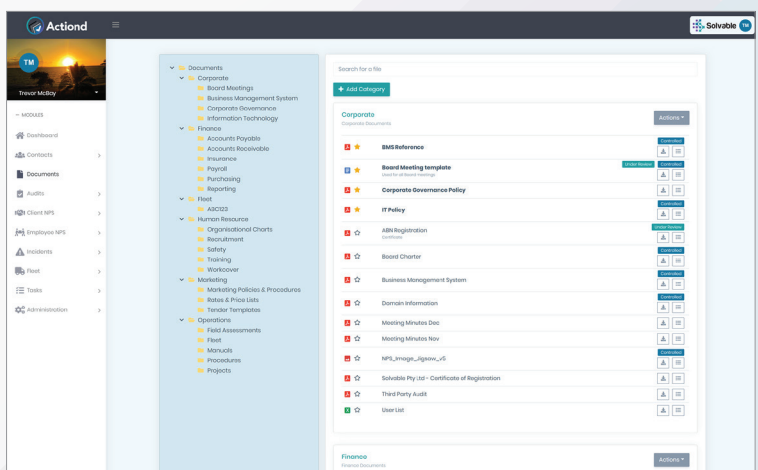

Keep up to date with your latest statistics and ratios and **Take Action**.

Document Management

When you need to provide your workforce with access to documents and ensure they are current and up to date, **Actionond** provides your team access to these documents anywhere on any device.

You will have greater control through permission-based access and **Actionond** will reduce the use of obsolete documents.

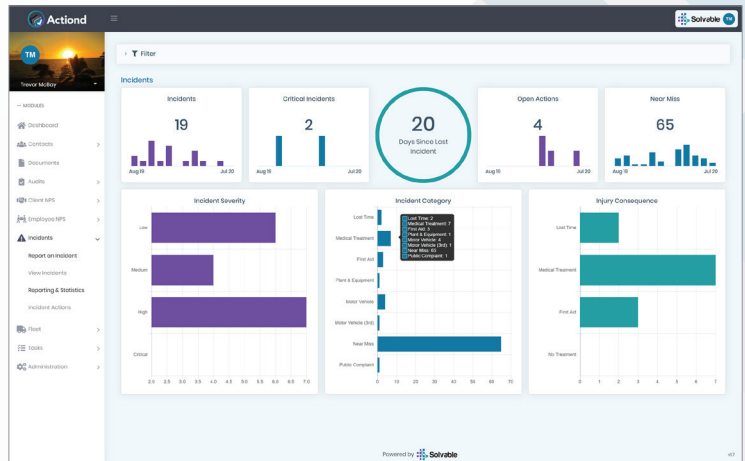

Incident Management

Actiond helps you proactively manage risks, identify problem areas, track incidents, and monitor performance.

Actiond has been designed to help you improve and grow your safety programs ensuring every worker is safe while on the job; all while meeting compliance requirements.

Auditing

Actiond provides visibility and insights to help improve safety and quality standards across your business. Through standardised auditing processes, you can identify problem areas and focus training, or take action, **before** an incident occurs.

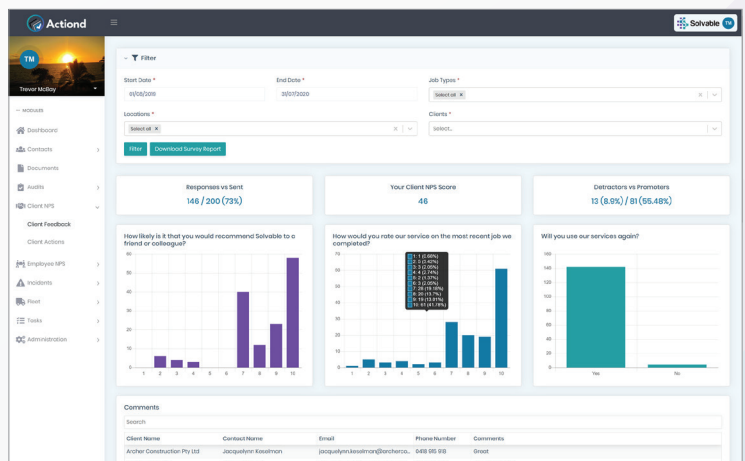

Client and Employee Surveys (with Net Promoter Score - NPS®)

Net Promoter Score (NPS) is a management tool that can be used to monitor the loyalty of your company's customer or employee relationships.

This metric was introduced in a 2003 Harvard Business Review and is used by companies around the world as a benchmark measure.

Actiond automates the sending of surveys, gathering responses and presenting data in a meaningful way for your team to take corrective action.

Fleet Management

Actiond Fleet Management Module allows you to integrate your fleet information with external systems and create actions for faults or issues in a flash.

Maintain a clear view on outstanding tasks and never miss a fault again.

The screenshot shows the 'Task Actions' table in the Actiond interface. The table has columns for Created Date, Actioned Date, Time to Action, Task Number, Category, Priority, Actioning User, Created By User, and Actions. The data is as follows:
